

AGRICULTURAL STATISTICS

OF

IRELAND,

WITH DETAILED REPORT FOR THE YEAR
1904.

Presented to both Houses of Parliament by Command of His Majesty.

DUBLIN :
PRINTED FOR HIS MAJESTY'S STATIONERY OFFICE,
BY ALEXANDER THOM & CO. (LIMITED).

And to be purchased, either directly or through any Bookseller, from
E. FONSEBY, 118, GRAFTON-STREET, DUBLIN ; or
WYMAN AND SONS, LTD., PATTER-LANE, E.C., and
32, ABINGDON-STREET, WESTMINSTER, S.W. ; or
OLIVER & BOYD, EDINBURGH.

1905.

[Cl. 2722.] Price 1s.

To

HIS EXCELLENCY, WILLIAM HUMBLE, EARL OF DUBLEY,
Lord Lieutenant-General and General Governor of Ireland.

MAY IT PLEASE YOUR EXCELLENCY,

I am directed by the Vice-President to submit to Your Excellency the Tables and Detailed Report on the Agricultural Statistics of Ireland for the year 1904.

I have the honour to be,

Your Excellency's faithful Servant,

T. P. GILL,
Secretary

DEPARTMENT OF AGRICULTURE

AND TECHNICAL INSTRUCTION FOR IRELAND,

UPPER MERRION STREET, DUBLIN,
25th August, 1905.

DUBLIN CASTLE,

30th August, 1905.

SIR,

I have to acknowledge the receipt of your letter of the 25th instant, forwarding, for submission to His Excellency the Lord Lieutenant, the Tables and Detailed Report on the Agricultural Statistics of Ireland for the Year 1904.

I am,

Sir,

Your obedient Servant,

J. B. DOUGHERTY.

THE SECRETARY,

DEPARTMENT OF AGRICULTURE AND

TECHNICAL INSTRUCTION,

UPPER MERRION STREET.

DUBLIN.

AGRICULTURAL STATISTICS, IRELAND,

1904.

REPORT

TO THE

SECRETARY OF THE DEPARTMENT OF AGRICULTURE
AND TECHNICAL INSTRUCTION FOR IRELAND.

SIR,

I have the honour to submit the detailed Annual Report on the Agricultural Statistics of Ireland for the year 1904.

The Summary Tables (pp. 2-21) have been included as usual in order to bring out clearly the chief features of the Agricultural Statistics contained in the Detailed Tables (pp. 22-165). A Table of Contents will be found on pp. xxxiii.-xxxviii.

With regard to the accuracy and comparability of the Tables, it should be pointed out that certain returns are more satisfactory than others. Those, for example, of live stock, of the acreage under the cereal, root, and flax crops, of the number and classes of holdings—excepting holdings under one acre—may be said to be accurate, and one year may be compared with another. But there are cases, as in the estimate of bog, waste, barren mountain, &c., and similarly with regard to the forestry area, where reserve is necessary in making comparisons. In these cases what prevents comparability is not so much the lack of accuracy, in the common sense of the term, as the difficulty of establishing a common measure or standard. Two enumerators will not always interpret an instruction alike, and a given piece of land may be classified by one as barren mountain and by another as pasture, or a tract of mountain-side which carried a few score sheep in one year may not happen to be grazed at the time of enumeration in a succeeding season, with the result that it is entered on the statistical forms in a different column on each occasion. Such indeterminate grazing areas are, doubtless, a source of error in comparative classification; but every effort is made by carefully-worded instructions, by queries to the enumerators for purposes of verification, and in other ways, to minimise the possibilities of serious error. Moreover, errors of classification of the kind referred to would probably tend to correct each other when a long series of years is taken into consideration. The chief danger, therefore, so far as concerns the use and interpretation of the statistics, lies in looking too narrowly and in overlooking the elements of uncertainty which inhere in particular returns.

The total area of Ireland—according to the Census of 1901—was 20,845,328 statute acres. The inclusion of 5,397 acres of reclaimed slob in the County Wexford brings the total area to 20,850,725 statute acres. This total includes 117,135 acres under water, but excludes close on half a million acres (487,418 is the exact number) under the large rivers, lakes and tideways. The following statement shows the general economic character of the areas in 1903 and 1904:—

—	1903.	1904.	Increase.	Decrease.	Net Change.
Crops, Cereals (excluding Hay), ...	1,506,345	1,279,169	—	27,156	
Crops, Roots, and Green, ...	1,669,783	1,680,453	—	2,900	
Flax,	44,685	44,323	—	392	— 36,848
Hay (on rotation Land),	627,229	631,748	4,629	—	
Hay (on Permanent Meadow), ...	1,496,906	1,628,412	31,506	—	+ 35,995
Pasture (Temporary rotation), ...	608,776	647,416	38,640	—	
Pasture (Permanent),	2,968,945	2,959,223	—	49,722	— 11,082
Small Fruit,	4,691	4,512	—	79	— 79
Fallow,	5,131	4,848	—	283	— 283
Woods and Plantation,	304,062	303,118	—	934	— 934
Bog, Waste, Barren Mountain, Water Marsh, &c.,	4,804,553	4,817,483	13,231	—	+ 13,231
	20,850,725	20,850,725			

CROPS.

From the above statement it will be seen that in the land under crops—other than hay—there has been in 1904, compared with 1903, a decrease in the total crop acreage of 36,848 acres. On the other hand, there has been an increase of 35,995 acres in the area under hay, of which increase 4,489 acres were on rotation land, while 31,506 acres were on permanent meadow. As regards pasture, it will be seen there is a net decrease of 11,082 acres—due to the shrinkage in the area of permanent pasture—while in the case of bog, waste, and barren mountain, a considerable increase is shown. But as there is always the practical difficulty of classification referred to, with regard to certain tracts of permanent pasture on the one hand, and bog, waste, barren mountain on the other hand, and as the statistical returns show from year to year considerable fluctuations in these areas, care must be taken in their interpretation, as otherwise an exaggerated importance either in one direction or another may be given to an apparent rather than real change.

In one other respect similar care is necessary in drawing conclusions. From the Table above it will be noticed that the increase of temporary or rotation pasture exceeds the decrease in the area under crops. In addition, there is the increase in hay

on rotation land. From these facts the inference may be made that part of the decrease in permanent pasture is due to land passing into rotation, for the increase in rotation grass and rotation hay exceeds by over 6,000 acres the decline in the area under cereals, roots, and flax. This may to some extent be the case. But on the other hand it should be pointed out that the distinction between temporary pasture which has increased—and permanent pasture which has considerably declined—is variable and unsatisfactory, and that no regulation can overcome this difficulty, though in some degree it is possible to obviate it.

The classification which has been adopted in the summary table on the opposite page is made with the object of throwing some light upon the important question of the transfer of land in Ireland from tillage to pasture. There is, however, a certain indefiniteness with regard to the terms arable and pasture land owing to the intermediate position which is held by hay. As has been pointed out in previous reports, grass land under rotation, still more hay land under rotation, is strictly speaking arable land. On the other hand, hay grown on permanent meadow is usually classed as pasture. But inasmuch as hay land has a different economic character from pasture land, and as it has an area now approximating to the total area under cereals, roots, and flax, it is important in Ireland for practical purposes that the threefold distinction should be made, crops, hay, and pasture, and that they should be separately shown.

The changes which have taken place in these areas during the past 10 years are presented in the following table :—

—	Crops (excluding Hay).	Hay.	Pasture.	Total.
	Acres.	Acres.	Acres.	Acres.
1895, ...	2,665,051	2,191,476	10,280,424	15,136,951
1896, ...	2,640,796	2,202,424	10,333,037	15,176,257
1897, ...	2,538,594	2,176,142	10,463,510	15,207,246
1898, ...	2,630,360	2,174,670	10,476,112	15,281,142
1899, ...	2,608,038	2,118,907	10,575,912	15,302,857
1900, ...	2,438,017	2,165,715	10,563,379	15,222,104
1901, ...	2,452,459	2,178,592	10,577,238	15,208,289
1902, ...	2,436,703	2,168,464	10,635,431	15,239,601
1903, ...	2,410,813	2,224,165	10,697,721	15,332,699
1904, ...	2,373,505	2,200,160	10,580,639	15,254,264

This table brings out several points. The acreage under crops has been steadily falling during the past **Crops (excluding Hay)** ten years. In the first half of the period, the year 1897 marked an abnormal decline—a decline, it will be remembered, especially in root crops—and if since that year the decrease in the crop acreage has been somewhat slower, there is yet little evidence of any check. For, with a diminishing area, as the marginal crop land passes out of rotation, a decline would naturally be expected in the ratio of decrease.

The changes which have been coming over cereal and root crops respectively are dealt with later in the Report.

While crops have been declining, hay, which is here distinguished, has, in recent years, shown an important increase. During, however, the first five years of the decade, 1895-1904,

there was a considerable decline in the hay area, but in the last five years, and notably in the last two, the increase has been marked, amounting in the years 1903 and 1904 to a total exceeding 90,000 acres. It is of interest, further, to note how far the increase has been in hay on rotation land, and how far in the crop grown on permanent pasture. This is summarily shown in the following table:—

—	HAY CROP.		
	Rotation Land.	Permanent Meadow.	Total.
	Acres.	Acres.	Acres.
1895, ...	635,683	1,508,890	2,194,476
1896, ...	655,971	1,547,353	2,202,424
1897, ...	637,123	1,539,014	2,176,142
1898, ...	652,040	1,522,430	2,174,470
1899, ...	624,163	1,494,744	2,118,907
1900, ...	607,359	1,558,335	2,165,715
1901, ...	617,330	1,661,262	2,178,592
1902, ...	603,468	1,561,906	2,165,464
1903, ...	627,259	1,596,906	2,224,165
1904, ...	631,748	1,628,412	2,260,160

From this table it appears that the increase in the latter part of the decade has been due to the extension of hay on permanent grass land. During the four years following 1895 a decline was marked in the acreage of hay on permanent meadow, but a sharp recovery took place in 1900, and the area has steadily increased since that year, the present year showing an addition of over 31,000 acres. On the other hand, the area of hay on rotation land has, while increasing in the earlier years, tended to fall, though in 1903 and 1904 a considerable recovery is shown. It will assist a right estimation of the changes which have been taking place in the growth of the hay area to recall the figures of the Census years from 1851, as shown in the following table:—

Total area under hay, 1851-1901.

1851, ...	1,246,408
1861, ...	1,546,206
1871, ...	1,829,044
1881, ...	2,001,029
1891, ...	2,059,529
1901, ...	2,178,592

The figures showing the distinction of hay grown on permanent land and on rotation land are only available from 1887.

The increase of pasture during the past ten years has been a feature almost as marked as the decline of crops, but a distinction must be drawn between the earlier and later years of the decade. The following table shows the areas respectively of rotation and permanent pasture from 1895 to 1904.

			Rotation Pasture.	Permanent Pasture.	Total Pasture.
			Acres.	Acres.	Acres.
1895,	649,792	9,630,632	10,280,424
1896,	664,915	9,668,912	10,333,827
1897,	614,361	9,847,949	10,462,310
1898,	601,916	9,869,103	10,471,019
1899,	636,363	9,968,639	10,605,002
1900,	611,837	9,962,035	10,573,872
1901,	616,440	9,969,798	10,586,238
1902,	684,463	10,030,961	10,715,424
1903,	608,776	9,988,945	10,597,721
1904,	647,416	9,930,223	10,577,639

It will be noticed that the great part of the increase in the last decade took place between 1896 and 1899, during which years, according to the returns, over 240,000 acres were added to pasture. Allowing a margin for the defects which inhere in the estimation of permanent pasture land, there is no reason to doubt the fact of a remarkable increase. These three years saw a decrease of over 130,000 acres in crops, and a considerable fall likewise in the area under hay. But since 1899, relatively to its great extent, it may be said that the area under pasture has been stationary. Between 1899 and 1902 it increased by 60,000 acres, but between 1902 and 1904 it has receded by almost 50,000 acres. It is also of interest to note with regard to the increase in pasture during the past decade that the area of rotation pasture has on the whole tended to shrink. The large increase of 39,000 acres in 1904 has restored the acreage to the level of 1895, but since 1897 the average area in rotation pasture has been lower than it was ten years ago. On the other hand, the increase in the total area in pasture has been due to an extension of permanent pasture which rose steadily till, in 1902, it exceeded 10,000,000 acres. During the past two years, however, it has undergone a considerable shrinkage which has reduced its area by over 70,000 acres. The growth of the total

area of pasture during fifty years may be seen from the following statement of the acreage for the Census years from 1851:—

1851,	8,748,577
1861,	9,533,529
1871,	10,071,285
1881,	10,075,424
1891,	10,298,654
1901,	10,577,238

With regard to changes in the crop areas, it is shown in the table on page vi., that the decline of 36,848 acres in 1904 consists of a fall in the acreage of cereals to the extent of 27,156, of 9,300 acres in the case of green crops, and of 392 acres in the case of flax. The following table shows the areas under the several cereal and root crops and the flax crop in 1903 and 1904:—

—	1903.	1904.	Increase or Decrease.	—	1903.	1904.	Increase or Decrease.
	Acres.	Acres.	Acres.		Acres.	Acres.	Acres.
Wheat, ...	37,596	30,825	-6,771	Potatoes, ...	620,303	618,540	-1,853
Barley, ...	158,712	158,043	-669	Turnips, ...	287,548	285,831	-1,717
Oats, ...	1,097,538	1,078,772	-18,766	Mangels, ...	75,908	75,746	-162
Born, ...	79	60	-19	Beet, ...	76	82	+6
Rye, ...	10,060	9,414	-646	Carrots, ...	2,118	2,111	-7
Beans, ...	2,080	1,890	-190	Parsnips, ...	706	616	-90
Pease, ...	290	185	-105	Cabbage, ...	44,545	39,665	-4,880
				Vetches, ...	2,602	2,761	+159
				Rape, ...	3,772	3,481	-291
				Others, ...	21,875	21,850	-25
Total Cereal Crops, }	1,306,345	1,279,189	-27,156	Total Root Crops, }	1,069,783	1,060,483	-9,300
				Flax, ...	44,685	44,293	-392

The changes in 1904 stand in certain respects in contrast to those shown in the report of 1903. Thus among cereals the acreage under oats in 1903 showed an increase of 15,394 acres, whereas in 1904 there was a decrease in the area of 18,766 acres, while the area under barley, which fell by 9,076 acres in 1903 as compared with 1902, was comparatively stationary in 1904. On the other hand, in both years, the wheat area relatively to its extent, has shown a very heavy decline, amounting in each year to over 6,000 acres. Among green crops, in cabbage there was in 1903 an increase of 2,212 acres, whereas in 1904 there was a decline of 4,880 acres, amounting to more than half the total decline in root crops in 1904. The decline in the total area under turnips has increased from 958 acres in 1903 to 1,717 acres in 1904. In the area under potatoes there is a shrinkage of 1,853 acres in 1904, as compared with 8,911 acres in 1903. Regarded relatively to the area and importance of the several crops, the decline in wheat and oats among cereals, and that in cabbage

and turnips among roots, are the most noteworthy features of 1904. Flax, as shown in the above Table, has remained comparatively stationary in 1904.

With regard to the changes which have taken place in the areas under the several cereal and root crops in Ireland since 1851, the following Tables distinguishing cereal from root crop give a summarised return for the census years and for the year 1904.

TABLE showing the Area under the Principal Cereal and Root Crops and Flax in each of the years 1851, 1861, 1871, 1881, 1891, 1901, and 1904.

Attention is drawn to the following points regarding the chief cereal and root crops, and the flax crop :—

Wheat.

The area under wheat in Ireland as in England and Scotland has diminished to a much greater extent than that of any other cereal, but during the past ten years the shrinkage appeared to be in some respects checked, and for several years a slight recovery was marked. Of late, however, there has been in Ireland a great decline in this cereal from 44,244 in 1902 to 30,825 in 1904—a figure which marks the lowest point in the area under wheat. In only eight counties in Ireland did the area in 1904 exceed 1,000 acres, and only five counties had an acreage of over 2,000 acres namely, Cork, 4,421; Down, 4,219; Wexford, 3,680; Galway, 2,289; and Dublin, 2,322.

Oats.

The acreage under oats in 1904, when compared with 1903, shows a decrease of 18,766 acres or 1·7 per cent. The importance of oats amongst the cereal crops in Ireland may be seen from the fact that whereas the total area under cereals amounted to 1,279,189 acres, the area under oats amounted to 1,078,772 acres. Almost half of the area under oats, namely, 521,087 acres, was grown in the Province of Ulster, but the largest amount in any county was in Cork, namely, 97,580 as compared with 93,621 acres in Down. The decrease mainly occurred in the Provinces of Ulster and Munster, and is the greatest which has taken place in any single year since 1900.

Barley.

The area under barley remained comparatively stationary in 1904, a decrease of 660 acres being recorded. At present the cultivation of barley on a large scale is confined to eight counties. Wexford, has by far the largest area of any county, amounting to 32,228 acres in 1904. Tipperary, which holds in 1904 the second place, has 18,454 acres; Queen's County, 18,248; Kilkenny, 17,086; Cork, 16,867; King's County, 14,874; Louth, 13,032; Kildare, 9,838. No other county has over 2,500 acres with the exception of County Carlow, which has 4,536 acres—a considerable area relative to the size of the county. The area under barley is thus at present largely limited to the Province of Leinster, which has 71 per cent. of the total area, and of Munster, which has 25 per cent. Ulster and Connaught in 1904 have respectively 2 per cent. of the total area.

Potatoes.

The area under potatoes has declined by over 90,000 acres during the past ten years. The decrease has not been confined to certain counties but has been general. At present Ulster has over one-third, viz., 254,079 acres of the total area under potatoes, while the other provinces have approximately equal areas, viz.: Munster, 129,255 acres; Connaught, 118,954; and Leinster, 116,252. Of the counties, Cork has the highest acreage in 1904, viz., 44,612 acres, Down has 41,984 acres, Mayo, 38,768; Tyrone, 36,745; Donegal, 36,695; Antrim, 35,220; Galway, 34,894. The lowest acreage is that of County Dublin, 5,938 acres. Attention is directed to Tables 17 and 18, pp. 120-127, in which is shown the extent in statute acres under each description of potato. In 1904 the acreage under "Champions" amounted to 61·3 per cent. of the total area as compared with 63·7 in 1903. Since 1891, when it reached 79·7 per cent., the proportion of the potato area under "Champions" has shown, with some slight fluctuations, a gradual decline. The area under the "Up-to-date" has increased from 38,630 acres in 1903 (6·2 per cent.) to 59,260 (9·6 per cent.) in 1904.

Turnips and Mangel Wurzel.

The area under turnips has also fallen considerably in the past ten years, though since 1901 the decline has been much less marked. On the other hand, there has been a notable increase in mangel wurzel, and the total area of turnips and mangel wurzel during the last ten-year period has been almost stationary. In the past three years, however, there has been a slight falling off in the area of mangels. The area under turnips in 1904 was in Ulster 94,927, a decrease of 2,510 acres; in Leinster 93,954, an increase of 139 acres; in Munster 72,876, an increase on 1903 of 1,147 acres; in Connaught, 24,074 a decrease of 493 acres. As regards mangels, only in Leinster is a slight increase shown in 1904.

Flax.

The area under flax in 1904 amounted to 44,293 acres—a decrease on 1903 of 392 acres. Of the total acreage in 1904, 44,027 acres were grown in Ulster; in Connaught there were 115 acres; in Leinster 87 acres; in Munster 64 acres. The area in flax declined rapidly until 1898, when it was 34,469 acres. In the years following it has fluctuated considerably, rising in 1901 to 55,442 acres, and falling in 1902 to 49,742 acres, and to 44,685 acres in 1903.

The decline in the area under the cereal, root, and flax crops is a feature which stands out in the history of agriculture not only in Ireland, but also in England and Wales, and, to a less degree, in Scotland. The following tables present summarily the changes

in the areas under cereal, root, and flax crops since 1867, from which year comparative information is available:—

Ireland (area 30,350,725 acres).

—	1867	1871	1881	1891	1901	1903	1904
Corn Crops, ...	acres. 2,115,790	acres. 2,124,034	acres. 1,777,175	acres. 1,492,763	acres. 1,317,274	acres. 1,305,345	acres. 1,278,128
Green Crops, ...	1,432,410	1,511,689	1,270,026	1,191,424	1,079,443	1,069,733	1,060,422

(a) Not distinguished in Returns for 1867.

The season 1904 was, on the whole, much better than that of 1903. In the earlier part of the year there was a fair amount of rain, while in the later part of the summer the weather was dry. The year was especially favourable to roots. As regards cereals, owing to the dryness of the latter part of the season, the grain did not "fill out" according to expectations, and this was especially seen in the case of barley. On the other hand, the dry season was particularly suitable to wheat as also to flax, in both of which crops a heavy yield per acre was obtained, though not equal to the exceptional return of the year 1902. The following table shows the estimated average produce for the principal crops, per statute acre:—

YEARS.	Estimated Average Produce Per Statute Acre.										
	Wheat.	Oats.	Barley.	Bere.	Rye.	Potatoes.	Turnips.	Mangel Wortzel and Beet Root.	Cab- bage.	Flax.	Hay.
	Owts. 112 lbs.	Owts. 112 lbs.	Owts. 112 lbs.	Owts. 112 lbs.	Owts. 112 lbs.	Tons.	Tons.	Tons.	Tons.	Stones, 14 lbs.	Tons.
1903, ...	168	152	164	158	134	38	125	135	97	302	22
Average 1891-1903, ...	173	155	175	155	139	38	142	163	100	259	23
1904, ...	181	159	149	145	130	43	175	175	102	337	24

The returns thus show a yield above the average in all crops, with the exception of barley. In the barley crop the yield per acre in Leinster—the province in which 71 per cent. of the total acreage exists—was the lowest recorded in the past ten years, and, in Munster, the only other province in which there is a considerable acreage, the yield was also much below the normal. The average produce of barley per acre over the whole of Ireland is the lowest recorded since the year 1887. On the other hand the yield of oats was slightly above, and of wheat was considerably over the average in the past ten years. The other cereal crops also show a good return, and inasmuch as prices were stronger than in 1903, the year was on the whole more satisfactory as regards cereals. In the case of root crops, especially in potatoes and turnips, the yield for Ireland as a whole was considerably above the average. The turnip crop was good in all the provinces, but in potatoes, while the yield in Ulster, which has the largest acreage of all the provinces, averaged 5·3 tons per acre, in Connaught it only reached 2·9, a figure very considerably below the average yield in that province. The yield of hay was slightly, and that of flax considerably, above the average crop in the past decade. The prices obtained also for both commodities in Ireland were better than in 1903.

On pages 9–11 a series of tables will be found showing the total acreage and estimated produce per acre of the several cereal and root crops in England, Wales, Scotland, and Ireland. The acreage of wheat, both in Scotland and Ireland is comparatively small, but the yield per acre in each country is much higher than in England, and reached, in 1904, 38·53 bushels in Scotland and 33·72 in Ireland. In barley also, the yield per acre in Scotland, 35·77 bushels, exceeded that in Ireland, 33·27 bushels, a reversal of the relative positions of the countries in 1903. On the other hand, in oats the yield in Ireland, 45·74 bushels in 1904, was considerably heavier than in England, 40·82, or in Scotland, 36·61. In regard to green crops, while Ireland had the heaviest yield per acre in turnips, viz., 17·48 tons, as compared with 17·25 tons in Scotland and 13·05 in England, the yield per acre in potatoes still remains very low, viz., 4·27 tons, as against 7·13 tons in Scotland and 6·11 tons in England. It must be remembered, however, that the area under potatoes in Ireland is on an average between two and three hundred thousand acres more than the area under the same crop in England.

Estimated Yield per Acre (Tons) of Potatoes and Turnips.
Average for Ten Years 1894–1903.

Crops.	England.	Wales.	Scotland.	Great Britain.	Ireland.	United Kingdom.
Potatoes, 	5·30	5·43	5·67	5·75	3·33	4·09
Turnips, 	11·96	14·74	14·89	12·79	14·93	13·10

The very considerable yearly fluctuations in the produce per acre of the potato crop is shown in the following tabular statement and accompanying diagram :—

Years.	Yield of Potatoes per acre, in Tons.	Years.	Yield of Potatoes per acre, in Tons.	Years.	Yield of Potatoes per acre, in Tons.
1885,	40	1892,	35	1899,	42
1886,	33	1893,	42	1900,	28
1887,	45	1894,	26	1901,	53
1888,	31	1895,	49	1902,	43
1889,	36	1896,	33	1903,	33
1890,	23	1897,	22	1904,	43
1891,	40	1898,	41	Mean,	37

The following table affords an estimate of the value of the principal root and cereal crops in Ireland in 1904. It does not, however, include the minor green crops, beet-root, carrots, or cabbage, which aggregate in 1904 a total of nearly 500,000 tons, nor may the estimate arrived at be regarded as anything more than a broad approximation of value :—

QUANTITY and VALUE of the principal IRISH CROPS in 1904.

CROP.	Estimated Produce in 1904.	Average Price.	Estimated Value of Crops.
	Thousand Cwt.	Per Cwt.	Thousand £.
Wheat,	537	7 1½	198
Oats,	17,183	5 6½	4,761
Barley,	2,348	7 2½	846
Bere and Rye,	123	6 6	40
Beans and Pease,	42	6 6	14
Flax,	187	54 6	510
	Thousand Tons.	Per Ton.	
Potatoes,	2,642	45 0	5,945
Turnips,	4,997	12 0	2,998
Mangold,	1,332	15 0	999
Hay, Rotation,	1,441	65 0	4,685
.. Permanent Pasture, ...	4,945	45 0	9,102
Total estimated Value of the Crops,	—	—	30,068

It should be noted that the difficulty in estimating the value of crops is especially great in the case of hay, the price of which

ranges from 30s. to £5 per ton. The calculation of value presented above has been made after careful consideration of the various prices recorded, and of the character of the acreage in Ireland under hay. It is well known that the price of hay fluctuates considerably from year to year. During the past twenty-five years there has been on the whole a tendency of hay prices to rise.

LIVE STOCK.

The changes which have taken place in the live stock of the country are in no way so remarkable as those seen with regard to crops, but they are not inconsiderable and are of great interest. The nature of the developments which have been at work may be in part shown by comparative tables of the several classes of stock in the Census years from 1851 to 1901. At the same time it will be remembered that statistics of numbers are only one index of change, and that the improvement in stock, which can only be indicated, and then insufficiently, by careful records of weights and prices, is equally if not more important.

Years.	Horses.	Mules.	Asses.	Cattle.	Sheep.	Pigs.	Goats.	Poultry.
1851	531,706	21,505	136,981	2,967,461	2,122,128	1,064,887	235,313	7,470,804
1861	614,232	20,145	173,711	3,471,688	3,566,050	1,102,042	189,842	10,371,175
1871	638,096	19,817	180,373	3,976,372	4,233,435	1,621,423	231,373	11,717,182
1881	43,354	26,392	187,143	2,366,695	3,256,185	1,066,830	266,078	13,972,426
1891	592,819	22,600	218,268	4,443,511	4,722,613	1,267,712	336,337	16,376,125
1901	664,916	22,882	228,980	4,673,323	4,378,760	1,219,135	312,408	18,810,717
1902	679,765	22,397	242,862	4,782,221	4,215,265	1,227,510	303,654	18,804,324
1903	695,746	22,795	213,241	4,664,112	3,944,604	1,283,516	299,120	18,163,714
1904	604,930	22,931	244,145	4,676,718	3,827,919	1,315,126	290,222	18,266,908

These figures, and others which are complementary, show that in point of number there has been on the whole an increase in horses, which has become more marked in recent years.

Horses.

In 1904 the number has again risen to over 600,000, though still

below the record of the years 1861 and 1862. The tendency to increase is shown also in the numbers of mules and asses.

As regards cattle, while between single years there are frequently marked fluctuations, and the record of individual years may reach a high point, there is observable a steady increase. In 1902, a year of exceptional demand, the record figure of 4,782,221 was reached. In 1903 the number fell to 4,664,112; in 1904 it has risen to 4,676,718 (an increase of 12,606), the highest total of cattle in Ireland with the exception of the year 1902. The following table shows in greater detail the changes in the number of cattle in 1903 and 1904 :—

CATTLE.					
	Milch Cows including Heifers in Calv.	Other Cattle.			Total Number of Cattle.
		Two years old and upwards	One year old and under two years.	Under one year.	
1903,	1,466,179	1,032,178	1,036,253	1,100,502	4,664,112
1904,	1,497,647	1,026,609	1,035,435	1,117,027	4,676,718
Increase,	2,468	.	.	16,525	12,606
Decrease,	5,569	818	.	.

The increase in 1904, it may be noted, has taken place in milch cows and in animals under one year. A table showing the number of milch cows in Ireland since 1854 will be found in Table S, page 20, from which it will be seen that the number in recent years, while showing a considerable increase as compared with the period from 1880 to 1890, is still below the record of several years between 1854 and 1877. Meanwhile the total number of cattle having increased, the proportion of milch cows remains much lower than in the earlier period. The matter is of no small interest to Irish agriculture, and the recovery in the number of milch cows evidenced in recent years is welcome.

The number of sheep continues to decline. There is also a considerable decrease in 1904 in the number of pigs. The falling off in the numbers alike in the case of sheep and pigs is chiefly among animals under one year. The number of goats has decreased by 8,898. An increase in the number of poultry is recorded for 1904. The following table summarises the main changes in 1904 as regards sheep, goats, pigs, and poultry:—

—	SHEEP.					PIGS.					GOATS.
	One year old and upwards.			Under one year.	Total Number of Sheep.	Pigs kept for breeding purposes.		Other Pigs.		Total Number of Pigs.	
	Ewes kept for breeding purposes.	Other Ewes.	Tups and Wethers.			Sows.	Boars.	One year old and upwards.	Under one year.		
1903. ...	1,035,179	217,435	512,063	1,538,924	3,944,004	147,807	2,044	24,839	1,190,825	1,353,518	293,120
1904. ...	1,024,933	217,534	504,920	1,530,583	3,827,919	133,540	1,867	22,131	1,150,585	1,315,155	286,222
Increase.	.	90
Decrease.	51,246	.	7,143	88,391	116,085	14,267	177	5,708	43,238	58,360	8,898

	POULTRY.				
	Turkeys.	Geese.	Ducks.	Ordinary Fowl.	Total.
1903. ..	952,787	1,708,513	2,896,841	12,529,473	18,153,714
1904. ..	976,238	1,725,421	2,898,755	12,550,515	18,254,959
Increase.	10,451	.	2,944	127,042	103,245
Decrease.	.	43,192	.	.	.

The remarkable position which Ireland holds as a cattle and horse breeding country, as on the other hand the relatively small number of sheep to other stock, may be further demonstrated by comparing the following tables showing the number

of live stock in Ireland, England, Wales, and Scotland, in the year 1867 (from which date comparative statistics are available), in the Census years following, and in the year 1904 :—

IRELAND.

(a) Statistics not collected until 1869.

In connection with the statistics of cattle, reference may be made to the export of live stock from Ireland to Great Britain. Considerable fluctuations occur in the exports of individual years, which are therefore unsatisfactory for purposes of comparison. The following table shows

Exports of Live
Stock.

the average for a series of years from 1871, since when a careful record of the export traffic has been made:—

—	Cattle.	Sheep.	Swine.	Horses.
10 years, 1871-1880 average, ...	633,890	681,894	451,603	23,488*
10 years, 1881-1890 " ...	689,391	693,917	472,605	25,449
10 years 1891-1900, " ...	731,196	890,277	589,173	35,839

*Average for the 4 years 1877-80 only, as the figures for the earlier years are not available.

The exports for the ten years 1895-1904 are as follows:—

—	Cattle.	Sheep.	Swine.	Horses.
1895,	791,037	652,573	647,220	34,560
1896,	681,560	737,806	610,589	39,856

The proportion of the number of cattle, sheep, swine and horses exported to the total numbers in Ireland is shown in the following table:—

TABLE showing the Percentage of Cattle, Sheep, Swine and Horses exported from Ireland to Great Britain to the Total Cattle, Sheep, Swine and Horses enumerated as in Ireland in each of the Years 1894 to 1904.

YEAR.	Percentage of Cattle, Sheep, Swine and Horses Exported, to Total Cattle, Sheep, Swine and Horses in Ireland.			
	Cattle.	Sheep.	Swine.	Horses.
1894,	18.8	23.3	42.1	5.4
1895,	18.2	16.7	40.9	5.5
1896,	15.6	18.1	43.5	6.3
1897,	16.7	19.3	52.4	6.3
1898,	17.9	19.4	47.0	6.6
1899,	17.1	20.0	50.5	7.3
1900,	16.2	19.7	50.4	6.5
1901,	13.8	19.3	48.9	4.5
1902,	20.1	26.0	48.1	4.4
1903,	19.2	20.9	41.2	4.7
1904,	16.6	19.3	38.4	4.5

The increasing degree of foreign and colonial competition with the Irish store and fat cattle export trade to Great Britain is indicated by the accompanying chart which shows the value of the foreign and colonial imports into the United Kingdom of all classes of beef and mutton in each of the 10 years 1895-1904.

The inquiries made in the preceding seventeen years relative to the extent to which bee-keeping is followed in Ireland were repeated in 1904, and according to the returns received, there would appear to have been a decrease of 31·4 per cent. in the quantity of honey produced in 1903 as compared with the preceding year, the returns for which showed a decrease of 27·0 per cent. as compared with the quantity in 1901. The quantity of honey produced, according to the returns, was 359,624 lbs.; of this, 95,602 lbs. were produced in the province of Leinster; 118,199 lbs. in Munster; 95,696 lbs. in Ulster; and 50,127 lbs. in Connaught. Of the 359,624 lbs., 252,955 lbs. were produced "in Hives having Movable Combs," and 106,669 lbs. "in other Hives." It was stated that 139,199 lbs. was "Run Honey," and 220,425 lbs. "Section Honey." The number of stocks brought through the winter of 1903-1904 amounted to 26,474; of which 15,041 were in hives having movable combs, and 11,433 in other hives. According to the returns collected, there were 3,850 lbs. of wax manufactured in 1903, of which 2,688 were from hives having movable combs, and 1,162 lbs. from other hives. The returns received in 1903 gave the number of swarms at work during the season of 1902 as 23,464; the quantity of honey as 524,166 lbs.; the number of stocks brought through the winter of 1902-1903 as 32,770; and the quantity of wax manufactured in 1902 as 5,890 lbs.

FORESTRY.

Of the total area of Ireland about $1\frac{1}{2}$ per cent. is under woods, whereas there is nearly 24 per cent. of uncultivated land. The woods in England are 5·1 per cent., in Scotland 4·5, and in Wales 3·8 per cent. of the total areas.

Since 1851 (with the exception of the year 1852) the acreage under woods and plantations has been ascertained annually in connection with the Agricultural Statistics; but until the year 1890 the total extent was the only information sought for, no particulars as to the kind of trees having been obtained. In that year returns giving the latter information were collected and the results were published in a table showing by counties the distribution of the various descriptions of trees.

The following table shows the acreage under woods and plantations in the year 1851, and in each year from 1853 to 1904, inclusive:—

Acreage under Woods and Plantations.

Year.	Statute Acres.	Year.	Statute Acres.	Year.	Statute Acres.
1851	304,906	1869	330,461	1887	329,263
1853	No Return	1870	330,853	1888	331,587
1853	305,221	1871	324,990	1889	326,343
1854	308,332	1872	325,703	1890	327,461
1855	306,476	1873	323,656	1891	311,554
1856	306,086	1874	322,263	1892	309,536
1857	312,817	1875	318,665	1893	307,286
1858	312,271	1876	324,152	1894	309,276
1859	318,874	1877	329,336	1895	308,923
1860	315,294	1878	328,687	1896	307,407
1861	316,597	1879	330,846	1897	307,441
1862	317,345	1880	339,858	1898	307,661
1863	317,134	1881	323,703	1899	308,495
1864	318,983	1882	328,999	1900	311,648
1865	322,152	1883	331,245	1901	309,741
1866	327,290	1884	332,006	1902	303,023
1867	323,420	1885	329,447	1903	301,052
1868	322,258	1886	329,662	1904	303,118

The above statement shows that, during the period 1851–1904 the number of acres under woods and plantations varied from 339,858 in 1880 to 303,023 in 1902, and that, comparing 1904 with 1851, there has been a decrease of 0·6 per cent., the extent in 1851 being 304,906 statute acres, and in 1904, 303,118 acres,—the lowest for any year (except 1902) during the period covered by the table.

In addition to the information regarding the total area under woods and plantations, returns were obtained in 1904 showing the proportion of the area entered under this heading occupied by each of the various kinds of trees. According to these returns, 42,069 acres of the total area (303,118 statute acres) under Woods and Plantations were under Larch, 31,579 under Fir, 15,799 under Spruce, 2,578 under Pine, 23,794 under Oak, 7,416 under Ash, 9,878 under Beech, 2,460 under Sycamore, 3,028 under Elm, 3,490 under Other Trees, and 161,027 were returned as under Mixed Trees. The area under Woods and Plantations in Leinster was 92,355 acres; in Munster, 101,994 acres; in Ulster, 57,833 acres; and in Connaught, 51,436 acres.

The inquiries as to planting and felling operations instituted in 1890 and continued in the thirteen

Planting and Felling. following years, were repeated in 1904.

During the year ended 30th June, 1904, 776 acres were planted with trees, 320 acres less than the extent planted in the preceding year. In connection with this subject, it may be here mentioned that from the passing of the Act 29 and

30 Vic., cap. 40, to the 31st March, 1904, 141 loans, amounting to a capital sum of £32,750, were sanctioned for planting for shelter. Two loans were sanctioned in the last year of that period. The number of trees felled, both for clearance and for thinning plantations, amounted in 1904 to 777,697. The area returned as cleared is 885 acres. It will be noticed that while, according to the Table on the preceding page, there would appear to have been a decrease of 934 acres under woods and plantations, the statistics of planting and felling show only a decrease of 110 acres. There is thus a discrepancy in the figures, but, as has been pointed out in previous reports, considerable difficulties exist in ascertaining the area under woods and plantations from a very large number of persons, many of whom are imperfectly acquainted with the acreage under timber on their holdings. Of the trees felled, 356,849 were used for "propping," which appears to have been the chief purpose to which the timber of almost all descriptions was applied. The numbers applied to the principal specified uses comprise also:—1,300 trees for sleepers, 21,211 for paling, 17,533 for fuel, 10,522 for furniture and building purposes, 4,286 for carts, wagons, &c., 3,260 for clog soles, 6,323 for butter and egg boxes, and 3,300 for spindles.

HOLDINGS AND OCCUPIERS.

The numbers of holdings in Ireland in the years 1903 and 1904 are shown by counties, provinces, and in total, in table L, page 14. The numbers of holdings by Poor Law Unions in the year 1904 will be found on pp. 24, 26, and 28 (table 2).

The following summary presents the changes in the size of holdings in 1903 and 1904:—

Size of Holdings.	Number in 1903.	Number in 1904.	Increase or Decrease in 1904.	
			Increase.	Decrease.
Not exceeding 1 Acre,	74,890	75,701	811	—
Above 1 and not exceeding 5 Acres,	62,222	62,185	—	107
" 5 " 15 " "	154,631	154,290	—	341
" 15 " 30 " "	134,308	134,480	172	—
" 30 " 50 " "	74,386	74,329	—	57
" 50 " 100 " "	57,446	57,583	237	—
" 100 " 200 " "	23,038	22,933	—	125
" 200 " 500 " "	8,141	8,066	—	45
Above 500 Acres,	1,516	1,527	11	—
Total,	690,648	691,324	676	—

From this statement it will be seen that the most noticeable features in 1904 are the increase of holdings under one acre, the decrease in the holdings above 5 and under 15 acres, and the increase of holdings above 50 and not exceeding 100 acres

With regard to the holdings not exceeding one acre in which an increase of 811 is recorded in 1904, this information is mainly of interest from a social and economic point of view. So far as the purposes of agriculture are concerned, holdings not exceeding one acre may be excluded, for, apart from the difficulty to the enumerator of determining what plots of land not exceeding one acre may be regarded as agricultural, this class is mainly composed of gardens, labourers' allotments, &c., while the total area distributed amongst the 75,000 holdings is estimated to amount to less than 40,000 acres. Accordingly it is important when comparing totals to note whether or not in such cases there are included holdings not exceeding one acre. For whereas there has been for several years, with occasional exceptions, a marked upward tendency in the number of holdings "not exceeding one acre," the total of holdings "exceeding one acre," though much more stationary in the past decade, has been gradually declining. This may be seen from the following tables which show respectively the number of holdings "not exceeding one acre" 1851-1904, and the total number of holdings "exceeding one acre" 1851-1904:—

Number of holdings not exceeding one acre, 1851-1904.

Distribution of Holdings.

With regard to the distribution of the several classes of holdings, attention is directed to the following points:—

Of the 75,701 holdings returned as "not exceeding one acre," 50,047 are in Leinster and Munster. In those two provinces the increase, which was most marked throughout the decade 1891-1901, still continues. In Ulster, on the other hand, the increase, which up to 1891 was greater than in either Leinster or in Munster, became less marked in the period 1891-1901, and since 1901 a decrease has been shown. Connaught, however, presents a striking contrast to the other provinces, inasmuch as since 1861 the number of holdings not exceeding one acre has, while fluctuating, tended to fall, and in 1904 was recorded as 6,527.

This class of holdings, amounting in 1904 to 62,185, is comparatively evenly distributed among the four provinces. Ulster has 20,253, Leinster 17,608—a large proportion relative to its total number of holdings—Connaught and Munster respectively 12,253 and 12,071. During the past ten years the total number of these holdings has been remarkably stationary. The decrease noted in the past two years has taken place mainly in Connaught. In 1904 a slight increase is recorded in Ulster and Munster. The total area over one and not exceeding five acres may be estimated at approximately 225,000 acres.

This is the largest of the several classes of holdings in Ireland, amounting in 1904 to 154,290. In 1903 an increase of 194 was recorded. This year there is a decrease of 341. Regarding the number and proportion of these holdings there is a marked contrast between, on the one hand, Ulster and Connaught, and on the other hand, Leinster and Munster. In Ulster more than one-third of the total number of holdings over one acre belongs to this class, and in Connaught the proportion is still greater, whereas in Leinster such holdings amount to less than one-fourth, and in Munster to little over one-sixth. The total area of the holdings "above five and not exceeding fifteen acres" may be estimated approximately at 1,620,000 acres.

In 1904, this class of holdings, which since 1851 has been in number remarkably stationary, gradually falling, and of recent years slightly increasing, includes 134,480 holdings. As in the holdings between five and fifteen acres, so in those between fifteen and thirty acres, Ulster and Connaught have both absolutely and proportionately a much

larger number than Leinster or Munster. But in the present case the disparity is not so great, Ulster having in 1904 53,750, Connaught 34,409, Munster 24,446, Leinster 21,875. The total area of such holdings may be estimated approximately at 3,010,000.

It will thus be seen that in Ireland out of a total of 515,523 holdings exceeding one acre, 350,955 are of a size not exceeding thirty acres, and comprise less than one-fourth of the total area of the country.

The total number of holdings in this class amounted to 74,329 in 1904, a decrease of 37 on the number of 1903. The change has been slight since 1851, when the number was 70,093, and the increase has occurred mainly in Ulster and Connaught, and, to a much less degree in Munster. In Leinster, on the other hand, this class has tended to decrease. The numbers for the several provinces in 1904 were as follows:—Ulster, 25,215; Munster, 22,407; Leinster, 15,128; Connaught, 11,579. The total area of these holdings may be estimated approximately at 3,005,000 acres.

The total number of holdings in this class in 1904 was 57,683 an increase of 237, whereas there was a decrease of 122 in 1903. Since 1851, Above 50 and not exceeding 100 Acres. when there were 49,940 such holdings, there has been a considerable increase, but the past decade has done little more than maintain the number reached. Munster has much the largest proportion of such holdings, viz., 22,764; Ulster, 14,523; Leinster, 14,080; Connaught, 6,316. The total area included in this class may be estimated approximately at 4,244,000 acres.

The total number of holdings in this class in 1904 was 29,933, of which 9,344 were in Munster, 6,958 Above 100 and not exceeding 200 Acres. in Leinster, 3,607 in Ulster, 3,024 in Connaught. In 1851 the number was 19,753, and while in the earlier decades there was a considerable increase, in recent years a slight decrease has been evident. The present area of these holdings may be estimated approximately at 3,458,000 acres.

While the number of these holdings increased considerably in the decade 1851–1861, it has since tended to fall. In 1904, of the 8,096 holdings Above 200 and not exceeding 500 Acres. in this class there were in Leinster, 2,790; in Munster, 2,629; in Connaught, 1,641; and in Ulster, 1,036; comprising a total area which may be estimated approximately at 2,780,000 acres.

Holdings over 500 acres, while showing a slight increase in 1904, have, despite fluctuations, gradually declined during the past twenty years. At present out of a total of 1,527, there are in Connaught, 483; in Leinster, 432; in Munster, 345; and in Ulster, 267. The total area may be estimated approximately at 1,968,700 acres.

In general, regarding the changes in the size and distribution of the holdings in Ireland, three periods may be distinguished during the past sixty years. The first, in which change was catastrophic, had closed before the Census of 1851. The second, extending over from thirty to forty years, marked a gradual decline in the number of holdings over 1 and not exceeding 15 acres, with a corresponding increase in the larger classes of holdings. In the third period, that of the past twenty years, excepting holdings not exceeding one acre, the feature which stands out is that of the comparative absence of change. From year to year fluctuations sometimes considerable are seen, but when the view stretches over a series of years no continuous changes can as yet be discerned.

It will be observed from the study of the tables that Ulster is pre-eminently the province of small holdings. Altogether it has in 1904 only 19,433 holdings exceeding 50 acres in extent, whereas it contains 162,251 holdings of an extent above 1 and not exceeding 50 acres. Moreover, of these the greater number are between 5 and 30 acres in area. On the other hand, Munster is pre-eminently the province of holdings between 30 and 200 acres. In 1904, of its total number of holdings exceeding one acre, viz., 113,412, no less than 54,515 were of a size above 30 and not exceeding 200 acres. Further, it may be noted that among these holdings the proportion not only of those above 50 acres, but of those exceeding 100 acres in area is, when compared with the other provinces, relatively large. In Leinster there is no such predominance of small or large holdings, but every class is well represented. Leinster has, however, the largest number of holdings, exceeding 200 acres. In Connaught the most striking feature is the contrast, marked even more strongly than in Ulster, between the large number of holdings from 5 to 30 acres in extent, and the small number between 30 and 100 acres. To the former class belong about two-thirds of the total number of holdings in Connaught exceeding one acre, whereas of holdings from 30 to 100 acres there is a much smaller proportion than in any other of the provinces. On the other hand, Connaught has the largest number of holdings, "above 500 acres." The following tables present a synopsis of the distribution of the several classes of holdings among the counties and provinces in Ireland.

TABLE A.—Showing by Counties and Provinces, in Percentages, the Proportion of each group of Classified Holdings in 1904, 100 being taken to represent the total number of each class of holding in Ireland.

In many instances landholders occupy more than one farm, and in other cases farms extend into two or more townlands, the portion in each townland being enumerated and classified as a separate holding. Accordingly, on this account it has been considered desirable, with the view of ascertaining the number of occupiers, and of classifying them according to the total extent of land held by each, to obtain a return of the number of persons having more than one farm or holding. Each enumerator is, therefore, required to furnish the name of every landholder residing in his district who has two or more farms, or whose farm extends into two or more townlands, together with the area of each portion and the locality in which it is situated. From the number of actual occupiers thus arrived at, it appears that in 1904 there were 591,224 holdings in the hands of 545,502 occupiers.

The number of separate holdings, and the number of occupiers in each province in 1903 and 1904 respectively were:—

PROVINCES.	Number of Separate Holdings.		Number of Occupiers.	
	1903.	1904.	1903.	1904.
Leinster, ..	130,029	130,330	116,962	117,326
Munster, ...	136,618	137,182	124,070	124,610
Ulster, ...	201,094	200,811	187,991	187,897
Connaught, ...	122,907	122,901	115,602	115,499
Total, ...	590,648	591,224	544,625	545,402

The following table shows the number of occupiers, including those on holdings not exceeding one acre, in the several provinces in the years 1897–1904.

PROVINCES.	Number of Occupiers in the Year.							
	1897.	1898.	1899.	1900.	1901.	1902.	1903.	1904.
Leinster, . .	112,722	113,687	117,651	116,104	116,721	116,900	116,962	117,326
Munster, . .	117,175	117,974	121,604	122,780	123,436	123,118	124,070	124,610
Ulster, . .	187,963	187,837	188,742	189,559	187,904	187,974	187,991	187,897
Connaught, . .	115,654	116,860	116,157	116,116	115,177	115,637	115,602	115,499
IRELAND, .	533,514	535,358	544,154	544,559	543,238	543,619	544,625	545,402

It will be observed that during the years 1899-1904 the number of occupiers has remained stationary in Ulster and Connaught, and that the increase has taken place equally in Leinster and Munster. A similarly equal increase is recorded in these provinces in the number of holdings "not exceeding an acre," to which is due in considerable measure the increase in the total number of holdings.

I have the honour to be, Sir,

Your obedient servant,

W. G. S. ADAMS,

*Superintendent of Statistics
and Intelligence Branch.*

DEPARTMENT OF AGRICULTURE
AND TECHNICAL INSTRUCTION FOR IRELAND
